Lee County 4-H

Hello my name is Keven Ramirez and today I am going to talk about a lady who works hard for the government as a Clerk to the Board. Her name is Gaynell Lee and she is very nice and she gets everything ready for the county commissioners before their board meetings. Her responsibilities are to take care of the seven people of the County Commissioners, do the agenda, put together the notebooks for their meetings, as well as taking minutes on her computer on what is said during the meetings. Other responsibilities included in Ms. Lee's job are working with County Manager John Crumpton. They work together to determine what will be put into the agenda notebook. She chose this job because she likes working for the county and has worked 20 years for the county government with 9 years for Social Services. Her job isn't that easy and she said the most difficult part of it is dealing with the public. Ms. Lee's favorite part of the job is working with the commissioners. The most interesting things about the Lee County Government is that there are many, many, layers involved to understanding what goes on.
